

PROFILE

Hi, I am Jesse. I am currently 19, and I am seeking to further develop my programming knowledge through first hand experience.

I love all things technology and am always fascinated to learn more about how coding powers the world around us.

I am extremely passionate about making new software and programs. In my free time I like to program games and game ideas using C# and the Unity game engine.

Current GPA is 3.6

WORK EXPERIENCE

Coles - Team Member

September 2019 – Current
I am in charge of the Grocery department during my dayshift which involves tracking and replenishing stock lines, helping other departments and accepting stock deliveries for all departments, I also work in Night Fill at night stocking the shelves and helping customers.

PROJECTS

Climate Change & Temperature Statistics Website

I was responsible for:

- Planning and developing designs for the website.
- Creating a database in SQLite to store data.
- Using Java to connect the SQLite database to the webpages.
- Using Java to sort and filter data to show on website
- Using JavaScript to make graphs of the data required from the database.
- Using HTML/CSS in the creation and designing of the website.

MY SKILLS

Determination- My perseverance is my driving force behind always seeking to be better and improve in everything I do.

Communication- I seek to always be understanding of other and to make sure that everyone gets a say as well as being able to combine ideas into a final solution that everyone is happy with.

Problem Solving- I love being challenged into finding new solutions from everyday problems that arise in day to day live that I can improve upon and make easier for myself and others.

Teamwork- Everyone deserves a say, and I believe in the mentality that anyone's idea may inspire someone else's amazing solution.

Adaptability- I pride myself on how well I can get used to changes in environment and software.
